

Business Solution for Chemical Industry

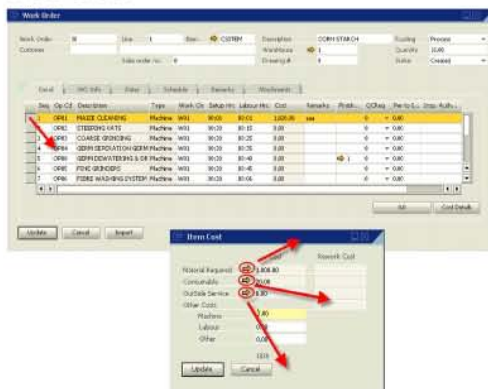

Solution is for Manufacturers of:

- Colours & Chemicals
- Specialty Colours
- Dyes & Intermediates
- Pigments & Preparations
- Resins & Organic
- Printing Ink & Ink Auxiliaries
- All other chemical verticals

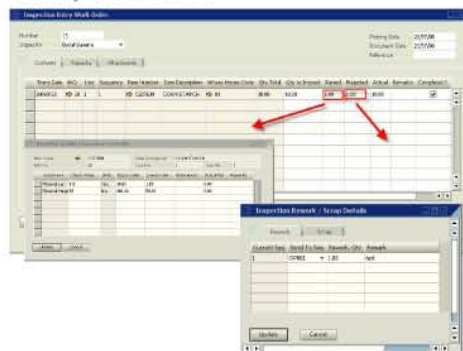

Highlights

- Special customized features for Chemical industry
- Instant Reports on Costing & Profitability
- Extensive Reports on MSDS, Labels, Standard Testing Procedure – STP etc.
- Certificate Of Analysis-COA
- QC, Production Cost Estimation and Management of WIP & By-Products
- Machine, Work Center and Shift Management
- Job work Management
- Plant Maintenance

Work Order

Quality Control WO

Routing Sheet

Business Solution for Chemical Industry

Custom Features for Chemical Industry :

> **MSDS (Material Safety Data Sheet)**

- Within MSDS it covers all the 16 Sections which are applicable in all Chemical Verticals.

> **STP (Standard Testing Procedure)**

- STP is maintained for work-in-process and finish goods
- STP is based on QC specifications

> **Certificate of Analysis (COA)**

- Based on the QC specifications and STP, the COA is retrieved for the finished goods

> **Labels**

- Labels are generated for products that are meant for dispatch

> **Work Center Management**

- Work centers are managed through a unique code & description
- Work centre availability for production planning
- Work centre cost per hour

> **Machine Management**

- A unique machine code & name for each machine
- Setup and Resting time for each machine
- Labour and machine cost per hour setup for each machine

> **Process Routing Management**

- Routing is managed through operation codes
- Multiple finished products' or by-products' management

> **Costing for Production**

- Production cost estimation & management
- Direct and indirect cost calculation
- Costing of sub contracting and rework

> **Operation Code Management**

- Operation master is managed
- Unique operation code for each operation
- Appropriate work centre assignment for each operation
- Operation type and week days are maintained

> **Job Work Management**

- Goods issued to & receipt from sub-contractor are managed
- Conversion master for goods issued & goods receipt
- Real time inventory and cost management for sub contracting

> **Quality Control Management**

- QC for finished goods & work-in-process
- QC for purchase
- Item and item group wise QC rules are setup
- Facility to approve or reject items

> **WIP Inventory Management**

- Inventory status at any stage of WIP
- Cost of inventory at any stage
- Costing of scrapes during WIP to get actual cost of production

> **Plant & Machine Maintenance**

- Machine break down & maintenance management
- Machine efficiency calculation
- Spare parts' inventory & maintenance
- Knowledge base for repetitive breakdown
- Instrument calibration management
