Business Solution for Packaging Industry

**Suitable For:**
- Suitable for both make to order and make to stock processes
- Suitable for plastic, metal and paper packaging

**Highlights**
- Controls costs and improves manufacturing processes
- Timely quotations through cost estimation
- Helps organize delivery schedules and customize product on demand
- Streamlines plant floor processes
- Accommodates for variations on labels and cartons
- Dynamics document resizing for a variety of package dimensions
- Streamlines Production Line
- Business analytics to evaluate product profitability
- Job Work Management
- Plant Maintenance
- QC for Finished Goods as well as RM
- Various Reports for a quick decision making

www.silvertouch.com
Features:

- **Work Center Management**
  - Managed through a Work Centre Master
  - Work Centre Code & Description for each WC
  - Work Centre Availability for production planning
  - Work Centre Cost per hour

- **Operation Code Management**
  - Operation Master is managed
  - Unique Operation Code for each operation
  - Appropriate Work Centre assignment for each operation
  - Operation type and week days are maintained

- **Machine Management**
  - Managed through a Machine Master
  - Machine Code & Name for each machine
  - Setup & Resting time for each machine
  - Labour and Machine cost per hour setup for each machine
  - Machine availability for production planning

- **Quality Control Management**
  - QC at various stages of production on Finished Goods as well as on WIP
  - QC on RM for purchase
  - Item and item group wise QC rules are setup
  - Facility to approve or reject the item

- **Routing Management**
  - Operation Codes for Routing or operation sequences
  - A unique Routing Sheet for each and every Production item.
  - Edition of Routing Sheet possible after release of production order without affecting the original Routing Sheet.
  - Multiple Finished Items or By-product can be entered at each sequence and operation level.

- **Costing for Production**
  - Production Cost estimation and management
  - Direct and Indirect Cost calculation for every production order
  - Costing of sub contracting and rework

- **WIP Inventory Management**
  - Inventory status at any stage of WIP
  - Cost of inventory at any stage
  - Costing of scrapes during WIP to get Actual Cost of Production

- **Job Work/ Sub contract Management**
  - Real time inventory and cost management for sub contracting.
  - Conversion Master for goods issued & goods received
  - Goods issued to sub contractor and goods receipt from contractor are maintained.

- **Plant & Machine Maintenance**
  - Machine maintenance schedule & breakdown rectification management
  - Knowledge base for repetitive breakdowns
  - Spare parts inventory and maintenance
  - Machine efficiency calculation according to breakdowns
