CASE STUDY

Project Information

Client Base
India

Industry Vertical
Construction

Project Type
SAP Business One ERP

Technology
ASP.NET | .NET Framework 4.0 & SAP Di Api | HANA Database

Pain Areas

- Manual CRM process
- Manual data entry
- Legacy system for purchase report
- Delay in Approval process
- Report Generation – Time Consuming and Tedious Task

Why SAP B1

- SAP B1 helps you better manage your projects, equipment workforce, and finances with quick and easy access to real-time information
- Multiple Projects, One Solution
- Get a 360° view of your construction, and operations firm
- Align design and construction to maximize productivity
- Optimize inventory with better resource planning and Management
- Establish new revenue streams with complete lifecycle services

Benefits

- Complete insight across projects, from headquarters to field project
- Analyze project schedules, resources, progress and earned value with integrated project systems
- Manage project changes in definition, scope, cost, and schedule to reduce risk exposure
- Manage mid-project variations and their impacts with single project view that combines both the operational and the financial perspectives
- Hassle free CRM process
- Alert, Report and Approval management
- Ease of use
- Statistical Reports for decision making
- Speedy online approval procedure for all departments
- Reduce time and cost
- Improve after sales support.

Implementation Highlights

- Fixed asset integration
- Documenting Detailed Business Flow
- Transaction work flow & Systems Integrity
- Implementation of SAP Business One & Procedures to streamline the Business tasks
- iPhone and android integration with Sap B1
- Dashboard integration with cockpit management
- Real time report for Flats sold/ unsold
- 4 different companies with different businesses created

Key Challenges

- Difficult to map construction process
- User resistance
- Monitoring stage wise expenses
- RA (Running Account) bill process
