India

Industry Vertical
Food & Beverages

Project Type
SAP Business One ERP

Technology
ASP.NET | .NET Framework 4.0 | MS SQL Server 2008 R 2

Tools
Microsoft Visual Studio

Pain Areas

Food and Beverage is web base application with following Pain Areas.

- No real time information
- Inaccurate report generation -a manual process
- Multiple independent Systems
- Poorly integrated organizational functions

Why SAP B1

- Manage ingredients / items throughout the whole value chain, yield scrap, waste, coand by-products, grades, etc.
- Helps to plan and control stock, production, packaging and distribution.
- Improve collaboration between stock, production & packaging/distribution to better manage perishable products and optimize production capacity, warehousing and cash flow in real-time
- Reduce manual workloads and duplicate entries
- Avoid machine break downs and interruptions in manufacturing process by better planning of resource availability
- Support multiple ways of manufacturing products, multiple recipes and multiple routings per product
- SAP Business One has easy to use reporting and dashboard tools built in – so it is easy to identify trends and helps in better business decisions

Key Challenges

- Lack of computer literate staff members
- Conversion of complete manual system to automated system

Proposed Solution

- SAP Business One ERP Software
- Implementation Partner
- Silver Touch Technologies Ltd.

Highlights

- Real time report for Flat sold/ unsold
- 4 different companies with different businesses created
- Designing Item coding for different stages of manufacturing

Benefits

- Improved Efficiency
- Increased Visibility
- Reduced Risk
- Help to manage Manufacturing business data
- Quality control, food safety, batch tracking and full product life-cycle traceability

Young. Agile. Lean. Competitive.
