Project Overview

"PPT Add-on" contain numerous Master and transactional forms which allows the smooth flow and presentable way to the end user as how the add-on works. Add-on user will fill the master data in the master form which thereby be used in transactional form which in return calculate the PPT Amount which will be applied to the Invoice of the end user. One major advantage of the Add-on is its ability to generate the relationship of master and child in between customers hence creating hierarchy and because of this ability Add-on is able to compute the benefits of the child customer to its parent customer as needed by the client.

Problem

Client wants to develop a SAP B1 Add-on - "PPT(Rebate)". Add-on will be able to generate PPT Bases on Omzet. Omzet It is the initial amount calculated based on the Invoice amount generated by the customer. PPT is the discount which is applied to the customer based on the multiple complex calculation which were given by the client.

Solution

Based on the Client requirements, Silvertouch proposed solution of .NET Framework (version 5.0) and HANA, Silver Touch have developed application as per the requirement of the client. The administrator user will able to manage whole system application.

Different types of users have different roles based on the authorization given by the client,

- Manager user will have full control of the Add-on.
- Users which have limited access will not able able to access the Add-on based on user authorization.

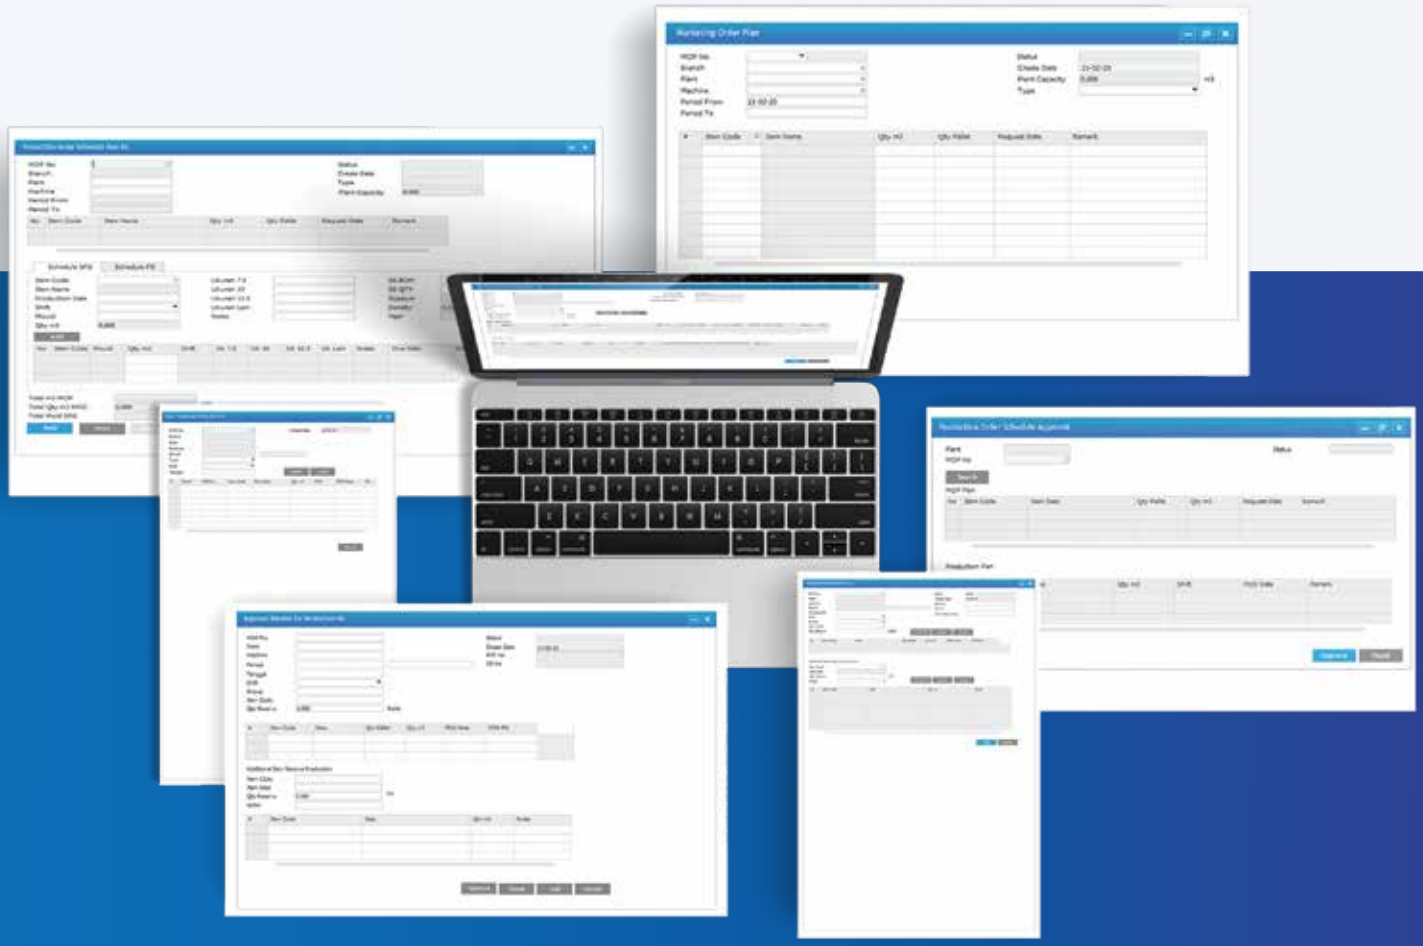

Result

- Project is successfully deployed at client environment.

Benefits

- Clean and manageable complex process.
- Reporting made easy.
- Control over the different process through the approval process at each stage.
- Automation of the complex process on just a click of a button.

Young. Agile. Lean. Competitive.

Silver Touch from the day of its establishment in 1995, is endowing clients, enterprises with its innovative IT Solutions. Our team of experts from all walks of applied sciences and work together to deliver super-smart organizational intelligence.
