Project Overview

Development of “Production Add-on” for various Master forms and transactional forms. Add-on user will generated the production based on the plant capacity as customer have multiple plants different MOP(marketing order planning) are made by the sales team after the MOP is generated they are approved by different users once these MOP are approved users. Once the MOP is approved then customer will generated the issue and receipt for the SFG item from the Issue and Receipt for Production SFG later on user can open the form of Receive From Production FG in this form user can manage the receipts of the production FG.

Problem

Client wants to develop a SAP B1 Add-on - “Production Module Customization”. Add-on will be able to make full or partial process of production and generate hundreds of issue of receipt and single receipt for production based on the masters and different screens given to the user for processing SFG and FG item.

Solution

Based on the Client requirements, Silver Touch proposed solution of .NET Framework (version 5.0) and HANA, Silver Touch have developed application as per the requirement of the client. The administrator user will able to manage whole system application.

Different types of users have different roles based on the authorization given by the client,

- Manager user will have full control of the Add-on.
- Users which have limited access will not able to access the Add-on based on user authorization.

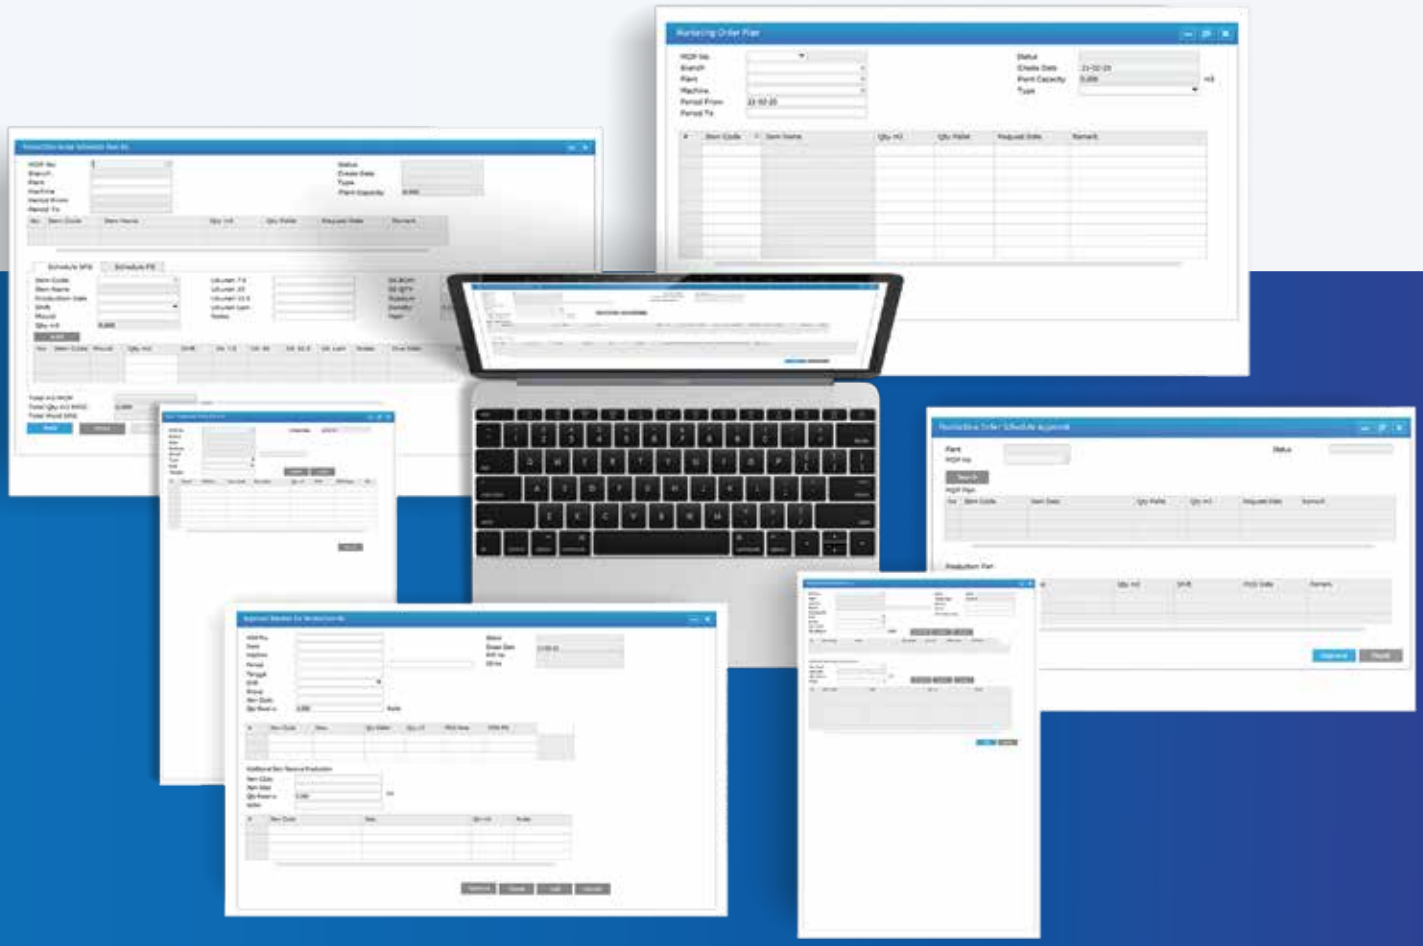

Result

- Project is successfully deployed at client environment.

Benefits

- Clean and manageable complex process.
- Reporting made easy.
- Control over the different process through the approval process at each stage.

Young. Agile. Lean. Competitive.

Silver Touch from the day of its establishment in 1995, is endowing clients, enterprises with its innovative IT Solutions. Our team of experts from all walks of applied sciences and work together to deliver super-smart organizational intelligence.
